

BuildingConnected Pro → Forma Bid

Feature availability tracker

This page tracks the availability of BuildingConnected Pro functionality inside Forma Bid. The majority of project-level functionality is available today, with several improvements. Your existing BuildingConnected data is the same data in Forma – both products can be used simultaneously, and all of your BuildingConnected data is accessible within Forma.

Features marked "Improved" or "New" represent capabilities that go beyond what was available in BuildingConnected Pro.

Note: the term "RFP" is used in place of "BuildingConnected Project" to separate bidding efforts from the Forma project.

Project-Based Functionality

This is where we focused our initial efforts. We have almost all project based functionality available in Forma.

FEATURE	STATUS	NOTES
Creating & managing RFPs (BuildingConnected projects)	● Available	Same as BuildingConnected.
Managing multiple RFPs per project NEW	● Available	Now you can manage multiple pricing efforts (RFPs) within a single Forma Project, instead of having to rely on multiple disconnected BuildingConnected projects.
Importing RFPs from templates	● Available	All data from BuildingConnected available; improvements to import flow include the ability to import bid packages with either/or bidders instead of always importing both.
Creating and managing bid packages	● Available	Same as BuildingConnected.
Network profiles	● Available	Same as BuildingConnected.
Sending bid invites and managing bidders IMPROVED	● Available	Same overall search functionality plus the ability to use natural language search when adding a specific bidder.
Document sharing	● Available	Improved file sharing via Forma Data Management
Messaging	● Available	Same as BuildingConnected; new ability to filter across messages.
Creating bid forms	● Available	Same as BuildingConnected; new ability to add item codes to more line items.
Viewing, submitting, and printing bids	● Available	Same as BuildingConnected.
TradeTapp Qualification Card IMPROVED	● Available	Significantly more TradeTapp data availability, including flags.
Bid levelling	● Available	We're investing heavily in Bid Levelling.
RFP Reports IMPROVED	● Available	Radical expansion of reporting by leveraging Forma Reports to provide custom filters and field selection for all existing BuildingConnected reports.
Sending TT qualification invites	● Available	Same as BuildingConnected.
Sealed Bidding Support	● Available	Same as BuildingConnected.
Creating contracts in Cost Management	● Coming Soon	New ability to link contracts and their SOVs to multiple budgets.
Indirect Project Costs	● Not Planned	Not on the roadmap. If you use this feature, we recommend investigating Forma Estimate.

Account & Company Functionality

Features related to company-wide settings and reporting

FEATURE	STATUS	NOTES
Network Suggested Edits	● Partial	You can see suggested edit information in the profile view, but not yet directly in the UI. For example, a changed phone number will display in the profile, but not yet on bidders list.
Profile Management	● Coming Soon	We're working to provide the ability to manage your profile natively within Forma. You can continue to use BuildingConnected for this functionality.
Builder's Network Employee Management	● Coming Soon	Research is underway. You can continue to use BuildingConnected for this functionality.
Builder's Network Office Management	● Coming Soon	Research is underway. You can continue to use BuildingConnected for this functionality.

Cross-Project Functionality

The below functionality remains functional inside of BuildingConnected. Whether you are using Forma Bid Board or still using BuildingConnected Pro, we are working to find a scalable way to integrate these multi-project pieces of functionality into the greater Forma platform.

FEATURE	STATUS	NOTES
Global Network Search	● Not Available	This refers to the free-form search field in the top navigation in BuildingConnected. We already support network search in the bidder invite flow.
Managing templates	● Not Available	We are actively investigating the best way to manage templates inside of Forma.
Contacts	● Not Available	We are investigating the best way to represent advanced reporting functionality inside of Forma.
Bid History	● Not Available	We are investigating the best way to represent advanced reporting functionality inside of Forma.
Calendar	● Not Available	We are investigating consolidating calendar functionality across our products.
Analytics	● Not Available	We are investigating the best way to represent advanced reporting functionality inside of Forma.
